## PROJECTS

### Project Name: Date Night

**Github:** <https://github.com/bcoggins78/group-project-1>

**Deployed:** <https://bcoggins78.github.io/group-project-1/>

App allows user to plan a dinner and movie with a significant other. Queries APIs for movie and restaurant data so the user can plan a successful date night without needing to drive all over town.

**Primary Responsibility:** Setup Firebase database for user authentication and to store the restaurant and movie information.

**Tools used:** HTML5, CSS3, Bootstrap, JavaScript, JQuery, Ajax, moment.js, Firebase.

**APIs:** Zomato, OMDb, Google Maps, Gracenote

### Project Name: PlayDate

**Github:** <https://github.com/bcoggins78/project-2>

**Deployed:** <https://gentle-forest-99048.herokuapp.com>

Full-stack app that allows a user to setup social events for pets and their owners. The user can add or search for events for their pet while also making new friends.

**Primary Responsibility:** Configure Google authentication and Sequelize.js to add users to the MySQL database.

**Tools used:** HTML5, CSS3, Vue.js, Bootstrap-vue, JavaScript, Ajax, Moment.js, MySQL, Node.js, Express.js, Sequelize.js.

**APIs:** Google Maps, Google Authentication

---

## PROJECTS (Cont.)

**Project Name:** onBoard

**Github:** <https://github.com/bcoggins78/onBoard>

**Deployed:** <https://quiet-fortress-68299.herokuapp.com/>

Full-stack app that allows users to connect with other people who enjoy board games. Users can create posts for specific games in order to schedule events with other players.

**Primary Responsibility:** Integrate Google Maps and designed the post form and post item layout.

**Tools used:** HTML5, CSS3, React.js, JavaScript, Moment.js, MongoDB, Node.js, Express.js, Mongoose.js, Ajax, Axios.

---
